

## Junior DB / SQL Specialist

**Adastra** is an international consulting company that creates functional solutions in various sectors, facilitating the transition to the digital era. Since its inception in the year 2000, Adastra has focused on data processing, analysis and warehousing. Data remains at the core of the company's activities, which have gradually expanded to include the Internet of Things (IoT), Big Data, Artificial Intelligence, and mobile app development.

**Adastra's aim** is to contribute to customers' businesses through smart data solutions. Clients include global and local leaders in the financial, banking, insurance, telecommunications, sales, and automotive industries, among many others including the public sector. Global projects are implemented from 10 offices by 2000 Adastra consultants.

We work in international teams and on projects for leading global financial, automotive, telecommunications and insurance pioneers. We pride ourselves in accepting the challenge of mastering new technologies with each new task and in empowering our clients in achieving results. What gives us satisfaction is the opportunity to apply innovation in our jobs.

**For our new venture in Thailand, we are currently looking to recruit** a Junior Database Specialist for our international Data Warehouse projects.

### Job Duties and Responsibilities:

- ✓ Analyze, design, develop, deploy, test and document BI or ETL solutions utilizing cutting-edge technologies
- ✓ Implement different technical solutions based on DWH fundamental concepts and best practices
- ✓ Extract data by using multiple tables
- ✓ Develop relational data models

- ✓ Participate in code reviews to ensure quality and integrity of project deliverables
- ✓ Capability to approach problems as challenges and deal with them constructively
- ✓ Represent Adastra and liaise with other client groups within the framework of a larger project team to deliver a unified solution

**Required Skills, Education, Knowledge and Experience:**

- ✓ Current enrollment in a Bachelor's degree in Computer Science or related numerate / quantitative subject preferred
- ✓ Knowledge and/or experience with databases, including one or more of the following RDBMSs: Oracle, Microsoft SQL Server, IBM DB2, Netezza, Teradata
- ✓ Good knowledge in writing SQL & PL/SQL code and/or one of the following: C, C++, Perl, Java or other programming language
- ✓ Strong analytical and communication skills
- ✓ English language proficiency (spoken and written). Knowledge of German language is a strong advantage
- ✓ Ability and desire to travel abroad

**What Adastra can offer you:**

- ✓ Receive on-the-job training
- ✓ Challenging projects in an international environment where open communication and knowledge sharing are encouraged
- ✓ Competitive compensation package and bonus scheme based on the personal performance review approach to recognition
- ✓ Comprehensive benefit plan
- ✓ Successful referral program
- ✓ The opportunity to work with one of the best in the IM field
