

## Junior QA Specialist

**Adastra** is an international consulting company that creates functional solutions in various sectors, facilitating the transition to the digital era. Since its inception in the year 2000, Adastra has focused on data processing, analysis and warehousing. Data remains at the core of the company's activities, which have gradually expanded to include the Internet of Things (IoT), Big Data, Artificial Intelligence, and mobile app development.

**Adastra's aim** is to contribute to customers' businesses through smart data solutions. Clients include global and local leaders in the financial, banking, insurance, telecommunications, sales, and automotive industries, among many others including the public sector. Global projects are implemented from 10 offices by 2000 Adastra consultants.

We work in international teams and on projects for leading global financial, automotive, telecommunications and insurance pioneers. We pride ourselves in accepting the challenge of mastering new technologies with each new task and in empowering our clients in achieving results. What gives us satisfaction is the opportunity to apply innovation in our jobs.

**For our new venture in Thailand, we are currently looking to recruit** a talented Junior QA Specialist who wants to participate in challenging projects, to work with an international team and to share experience and knowledge with technically proficient colleagues.

The ideal candidate should be excited about working in a fast-paced environment for one of the most advanced companies in the IM field, have very good analytical skills and passion to develop in the QA field. The new recruits will pass internal training courses in order to refine their technical expertise.
