

## Backend Developer - Urgently Required!

---

**Salary:** up to 40,000 THB

**Location:** BTS Thonglor

**Perks:** Flexible work hour, Free Food Friday, gaming lounge, office snacks, and more.

Our Software Engineering Team is currently looking for a dedicated and passionate Backend Developer to help us create an esports and gaming application. If you believe yourself to be an experienced with Ruby and its framework, Ruby on Rails, this is the opportunity to be part of the team, to have a part in creating an application in a fun and exciting industry that is gaming and esports!

### **Job Overview:**

- Implement Ruby on Rails and MVC concept to build the backend of the Erena application.
- Managing the interchange of data between server and the users.
- Development of all server-side logic, ensuring high performance and responsiveness to requests from the frontend.
- Testing, debugging, enhancing, and optimization of the code, of the application itself.
- Working closely with the Frontend Developers to ensure smooth integration of both the back and front-end elements built by the team into the intended application.

We are looking for someone with:

- Experience working with scripting languages such as Python and Ruby.
- Proficiency in Ruby on Rails and MVC concept for application development.
- Knowledge and understanding of Object-Oriented Programming.
- Good understanding of Relational Database Management System (RDBMS).
- Ability to write clean, efficient, and reusable code.
- Understanding in application development process and cycle.
- Understanding in version control tools such as (but not limited to) Git and Docker.
- An ability to perform well in a fast-paced environment.

- BSc degree in Computer Science or relevant field is preferred, but not needed.
