

Frontend Developer - Urgently Required!

Salary: up to 40,000 THB

Location: BTS Thonglor

Perks: Flexible work hour, Free Food Friday, gaming lounge, office snacks, and more.

Our Software Engineering team is looking for a dedicated and passionate Frontend Developer to help build the 'client-side' of our applications. With your help, we will create a user-friendly esports and gaming application. You will be working to create a user-friendly application within a fun, engaging, and proactive working environment. Ultimately, you should be able to create a functional yet attractive digital environment for the company, ensuring great User Experience.

Responsibilities include;

- Help Erena engineering team, developing Erena Esports Platform.
- Use React.js/Vue.js and markup languages like HTML and use to build user-friendly UI/UX.
- Implementation responsible web design principles to ensure the website and applications render well across multiple devices and platforms.
- Design framework for creating user applications that grows with the needs of the company.
- Assist in the development of applications and features that will be put on the web and app, and in internal functions as well.
- Application testing, debugging, and optimization.

We are looking for someone with:

- Proficiency in Javascript (React/Vue), as we work with React.js and Vue.js and their associated Frameworks.
- Experience in the use of markup languages.
- Knowledge in frontend development tools such as Babel, Webpack, yarn, etc.
- Familiarity with testing and debugging.
- Know how to use RESTful APIs
- Understanding of web development process (design, development and deployment).
- Understanding of code versioning tools such as, but not limited to Git, Docker.

- An ability to perform well in a fast-paced environment.
- BSc degree in Computer Science or relevant field preferred but not necessary.

*** Only shortlisted candidates will be contacted.
