

**AlgoWiser**

## **Internship Description**

Our company “AlgoWiser” is an algorithmic trading system Research Center and Asset Management company located in Thailand. We seek internship students with experience in software design, coding and debugging in Python and MySQL. The internship student will gain exciting real-world trading system development experience which is not taught in University.

We are open to giving internship to passionate students from any country. We consider only your skills and passion.

Our R&D department tasks are 100% remote work. The intern has full freedom to control their time to work on the tasks. We provide project plans and primary guide through each step. The intern will have chance to learn know-how in development of trading system in Equity & FX, contribute his programming skills to solve various challenges and make innovation. The ideal intern for this environment will be enthusiastic and collaborative.

## **Responsibilities**

- Develop time-series database in MySQL
- Develop backtest system (trading strategy implementation simulation) for FX and cryptocurrency in Python
- Research algorithmic trading strategy in Python
- Provide data analysis on correlation of price and volume between each asset

## **Requirements**

- Experienced in working independently
- Acquired basic knowledge in database development
- Ability to learn new skills to solve any challenges and come up with solution
- Interested in trading system
- Excellent programming skills in Python and MySQLs

## **Benefits**

- 100% work from home
- Practical experience with a wide variety of software engineering tasks
- Collaborating hand-in-hand with skilled teams of quant researchers (financial data engineers)
- Shadowing, mentoring, and training opportunities with seasoned professionals
- Compensation available
