- Thai Nationality / Age 22-30years

- Bachelor's Degree in Computer Engineering, Computer Science, or Information Technology related fields

- Pleasant personality, good communication and presentation skill

- Good command in English for reading and writing

- Experience with Oracle Database 18c, 19c and newer version (RAC, Pluggable database)

- Experience with RDBMS Database: Design, Implementations, Backup/Restore Solution, Tuning and High Availability Solution

- Ability to work with team, and also individually as DBA specialist

- Experience with MS SQL Server Technology and other RDBMS database system and Administration will be also advantageous

Cloud Engineer

Responsibilities:

- Work with energetic team in providing end-to-end services in both Cloud Environment and On-premises Environment.

- Advise on the appropriate design and running of cloud infrastructure.
- Participate in full-service life cycle from architectural design, implementation and migration to post-implementation maintenance and operation support of the critical production systems for our customers.
- Learning and working with the leading DBMS in the enterprise market, and modern Cloud Infrastructure technology.

Qualifications:

- Thai Nationality / Age 22-30years
- Bachelor's Degree in Computer Engineering, Computer Science major, or Information Technology related fields
- 2+ years' experience with Cloud Technologies, preferably Microsoft Azure or Oracle.
- Knowledgeable about Microsoft Azure and its relevant design, build, deployment, networking, and security technologies in cloud and hybrid environments.
- Experience in Azure Cloud Service (e.g., Infrastructure, Backup, Active Directory Domain Services, Azure AD, Microsoft WVD and Data Management)
- Pleasant personality, strong communication and presentation skill
- Good command in English for reading and writing

Senior Oracle Database Administrator

- Over 3-5 years of work experience in DBA position
- Bachelor's Degree in computer or related fields, Computer Engineering or Computer Science major
- Pleasant personality, strong communication and presentation skill
- Ability to work with team, and also individually as DBA specialist
- Good problem solving and analytical skills
- Good command in English for reading and writing ability Knowledge or Experience
- Experience with Oracle Database 12c and newer version (RAC, Pluggable database) (Experience with MS SQL Server Technology and other RDBMS database system and Administration will be also advantageous)
- Experience with RDBMS Database: Design, Implementations, Backup/Restore Solution, Tuning and High availability solution
- Experience with Unix (Linux, AIX, Solaris) and Windows Server Operating System: System concept and System Administration
- Experience with operations of Database System, Hardware, Server, SAN and Other Peripherals
- Knowledge of Computer Network, Network Security and Management
- Knowledge of Virtualization and Cloud Technology

ERP Consultant

Qualifications:

- ❖ Thai nationality
- ❖ Bachelor's degree in IT, Engineering, Business Administration, Accounting, Finance or related field. Advance degree desirable.
- ❖ 2-3 years working experience with ERP Consulting Role.
- ❖ Good Oracle or Microsoft D365 Functional would be an advantage.

Advisory Application Consultant

Qualifications:

- Over 3-5 years of work experience in ERP application implementation at least one key functional area such as: Finance , Distribution , Manufacturing, especially Oracle and Microsoft D365 would be an advantage
- Bachelor's Degree in Accounting, Computer Science or MBA and MIS would be an advantage
- Understanding and strong in ERP systems including business process knowledge
- Pleasant personality and strong communication skill
- Good problem solving and analytical skills
- Good command English of reading and writing ability
- Ability to work in a high pressure environment

Knowledge or Experience in the following areas:

- Experience in Oracle technologies (SQL, PL/SQL, Oracle Developer Suite) would be an advantage
- Experience in Oracle E-Business Suite or Microsoft Dynamics365 implementation would be an advantage

Senior Oracle DBA

Responsibilities:
- Work closely with sales team to formulate and execute a sales strategy to drive the adoption of Oracle Database and Core-Technology solutions
- Develop technical proposals and pitches to customers. Present proposals to customers alongside members of the sales team

- Manage and support the Oracle Database

Qualifications:
- Thai Nationality / Age 25- 30 years
- Bachelor's Degree in computer or related fields, Computer Engineering or Computer Science major
- Pleasant personality, strong communication and presentation skill
- Ability to work with team, and also individually as DBA specialist
- Good problem solving and analytical skills
- Good command in English for reading and writing ability Knowledge or Experience
- Experience with Oracle Database 12c and newer version (RAC, Pluggable database)
- (Experience with MS SQL Server Technology and other RDBMS database system and Administration will be also advantageous)

- Experience with RDBMS Database: Design, Implementations, Backup/Restore Solution, Tuning and High availability solution
- Experience with Unix (Linux, AIX, Solaris) and Windows Server Operating System: System concept and System Administration
- Experience with operations of Database System, Hardware, Server, SAN and Other Peripherals
- Knowledge of Computer Network, Network Security and Management, Virtualization and Cloud Technology will be advantageous.

Data Engineer

Responsibilities

- Pre-sales Support: involving preparation of the proposal and the demonstration system as well as supporting the sales team in presenting the products and services to potential customers.

- Implementation: directly and indirectly manage and perform the whole process of making the customers capable of operating their business as intended. He/she must have high expertise in areas of the technical implementation process especially in Design and Solution Architecture.

- Directly responsible for the Post-Implementation support. He/she is required to be effective in distributing problems to junior staff then coach and assist them on problem solving.

- Participate in full service life-cycle from architectural design, implementation and migration to post-implementation maintenance and operation support of the critical production systems for our customers.

Qualifications

- 2-5 years of work experiences

- Bachelor's Degree or higher in computer or related fields, Computer Engineering or Computer Science major would be an advantage

- Pleasant personality and strong communication skill

- Good management, Strong troubleshooting and problem solving, analytical skills, and communication skill

- Excellent problem solving and critical thinking skill

- Ability to work in a high-pressure environment

- Good command in English for reading and writing ability

Knowledge or Experience:

- Degree in Computer Science, Information Technology, Business Information Systems, or other related field

- Good knowledge of SQL query, Python, stored procedure and database structure

- Deep expertise in analyzing complex database query are a plus

- Performing data warehouse design and ETL process development

- Experience with Operations and Administration of Database System, Hardware, Server, and Other Related Components

- Experience of Virtualization and Cloud Technology

- Knowledge of RDBMS database operation and administration would be advantaged

- Knowledge of Linux and cloud technology would be advantaged

1. รวบรวมและจัดเตรียมข้อมูล สำหรับการทำ data warehouse (คลังข้อมูล)

2. ดึงข้อมูลด้วยคำสั่ง SQL หรือ Python จากระบบฐานข้อมูล

3. ออกแบบ data warehouse ตามความต้องการในการวิเคราะห์ข้อมูล

4. จัดทำกระบวนการ ETL เพื่อใช้สำหรับ data flow

5. ตรวจสอบความพร้อมใช้ข้อมูล และความถูกต้องของข้อมูล

Azure Cloud Consultant

Responsibilities:
- Work closely with sales team to formulate and execute a sales strategy to drive the adoption of Microsoft Azure solutions
- Develop technical proposals and pitches to customers. Present proposals to customers alongside members of the sales team
- Initiate, coordinate, and implement proof-of-concepts with customers
- Implement Azure Cloud such as provisioning, configuration and migration
- Documentation of solutions (e.g., architecture, configuration and setup).
- Provide effective knowledge transfer and upskilling to relevant customer personnel to ensure an appropriate level of future self-sufficiency.
- Manage and support the Azure Cloud

Qualifications:
- Thai Nationality / Age 25- 30 years

- Bachelor's degree in Information Technology, Computer Engineer, Computer Science or relevant field

- 5+ years' experience with Cloud Technologies, preferably Microsoft Azure.

- 3+ years of experience as a Cloud Architect or equivalent experience in software sales, pre-sales, or customer-facing role

- Knowledgeable about Microsoft Azure and its relevant build, deployment, networking, and security technologies in cloud and hybrid environments.

- Experience in Azure Cloud Service (e.g., Infrastructure, Backup, Active Directory Domain Services, Azure AD, Microsoft WVD and Data Management)
